Coronavirus (COVID-19)
RESOURCES FOR SORORITIES AND FRATERNITIES

Holmes Murphy offers this educational information to provoke thought and discussion and it should not be viewed as a mandate or requirement.

We view part of our role as an insurance and risk management professional to anticipate your needs and educate you in an effort to complement the organization's loss prevention and control efforts, not replace the decision making autonomy of our client organizations. We hope you find this educational piece to be of value and stand ready to discuss it further with you or any of your constituents.

The Higher Education Center for Alcohol and Drug Misuse Prevention and Recovery (HECAOD) and NASPA - Student Affairs Administrators in Higher Education have provided a few resources to help. Check them out below:

Virtual Water Cooler Chats (HECAOD)

**When:** Tuesdays at 2:00 p.m. ET and Fridays at 11:30 a.m. ET  
**Where:** You can [join via Zoom](https://example.com)

These informal chats provide an opportunity to connect with others in the field. Tuesdays will focus on a specific topic and Fridays will offer open conversation. Joining by video is preferred and no registration is required.

- Tuesday, 4/7: Cannabis, 4/20, and the Current Environment  
- Friday, 4/10: AOD Professional Open Chat  
- Tuesday, 4/14: Taking it Digital: Adapting Best Practices

Submit Your Questions to Peers (HECAOD)

Do you have questions about how you can continue programmatic efforts? [Submit them here](https://example.com).

HECAOD will compile them and, using crowd-sourcing, try to find feedback to as many as they can. They will share questions and answers on their website. [Go to HECAOD's site for more resources for professionals](https://example.com).
What a College Should NOT Do During a Recession

<td>Description</td>
<td>Register now for What Colleges Should NOT Do During a Recession. During this interactive forum, we will offer a framework for how universities should be planning for strategic changes on their campus.</td>
</tr>
</tbody>
</table>

Hosted by Scott Carlson, a senior writer at The Chronicle, and the strategy expert and co-founder of ABC Insights Paul N. Friga, this forum features Lynn Pasquerella, president of the Association of American Colleges & Universities, to discuss key questions higher ed leaders need to consider during a recession, including:
- What are the five recession myths?
- How do they apply to higher ed?
- What should we do to change our models?
Someone tested positive... NOW WHAT?
Testing for COVID-19

There are laboratory tests that can identify the virus that causes COVID-19 in respiratory specimens. State and local public health departments have received tests from CDC while medical providers are getting tests developed by commercial manufacturers.

Who should be tested

Not everyone needs to be tested for COVID-19. Here is some information that might help in making decisions about seeking medical care or testing.

- Most people have mild illness and are able to recover
- There is no treatment specifically approved for this disease
- Testing results may be helpful to inform decision-making

CDC has guidance for who should be tested, but decisions should be made by medical providers and local health departments and/or individual clinicians.

- Clinicians should work with their state and local health departments to coordinate testing
If you are sick with COVID-19 or suspect you are infected with the virus that causes COVID-19, you should take steps to help prevent the disease from spreading to people in your home and community.

If you think you have been exposed to COVID-19 and develop a fever and symptoms, such as cough or difficulty breathing, call your healthcare provider for medical advice.

SOMEONE TESTED POSITIVE...

HMFP
- Who owns the decision around the protocol?
- What is your protocol?
- Can they self quarantine in the facility?
- How is the university responding?
- How is the insurance going to respond?

Clay Wardlaw, Safety Plus, LLC
- What is the cleaning protocol?
- How do you decontaminate?
- What is decontamination versus cleaning?
Cleaning and Disinfection for Households
Interim Recommendations for U.S. Households with Suspected or Confirmed Coronavirus Disease 2019 (COVID-19)

Summary of Recent Changes
Revisions were made on 3/26/2020 to reflect the following:
- Updated links to EPA-registered disinfectant list
- Added guidance for disinfection of electronics
- Updated core disinfection/cleaning guidance

Background
There is much to learn about the novel coronavirus (SARS-CoV-2)
Pesticide Registration

List N: Disinfectants for Use Against SARS-CoV-2

All products on this list meet EPA’s criteria for use against SARS-CoV-2, the virus that causes COVID-19.

Finding a Product

The easiest way to find a product on this list is to enter the first two sets of its EPA registration number into the search bar below.

For example, if EPA Reg. No. 12345-12 is on List N, you can buy EPA Reg. No. 12345-12-2567 and know you’re getting an equivalent product. You can find this number by looking for the EPA Reg. No. on the product label.

Using Other Products

If you can’t find a product on this list to use against SARS-CoV-2, look at a different product’s label to confirm it has an EPA registration number and that human coronavirus is listed as a target pathogen.
ProKure™ V Liquid Disinfectant / Deodorizer / Fungicide

- Suitable for water and smoke damage restoration
- Kills bacteria, viruses*, mold, and odor-causing bacteria
- Water-activated; no rinse required
- Use on any wet-cleanable hard or soft surface
- EPA Registration No. 87508-3-89334

Stay informed about the latest GBAC information and events.

Sign up for the new GBAC Fundamentals Online Workshop with a special emphasis on the novel coronavirus, SARS-CoV-2.

Composed of international leaders in the field of microbial – pathogenic threat analysis, mitigation, response & recovery, The Global Biorisk Advisory Council (GBAC) provides training, guidance, certification, crisis management, assistance and leadership to government, commercial and private entities looking to mitigate, quickly address biological threats and real-time crises, and/or recover from such events.
Our house is closed but many have not been back to retrieve their personal belongings. When the crisis is over and we begin again to travel, how do we keep members away who may feel ill but need to get their personal things for the summer break?

I would hate to have to disinfect the entire house due to the error of one returning member. They will not be permitted to spend a night in the house.
What will fall semester look like?
