

YOUR
proposal IS NOT
a plan

2017 LOSS PREVENTION & RISK MANAGEMENT SEMINAR

This session will explain why your successful proposal isn't a project plan. The program will provide an in-depth discussion of a streamlined approach to efficiently and effectively plan a project. We'll examine the components of the project such as building systems integrity, drawings and specifications, land-use analysis, and construction methods while incorporating the health, safety, and welfare requirements of the project. Additionally, the project management plan provides a tool to identify and manage project risks.
