

What Does Leak Defense Offer?

Water monitoring
system

Tracks unusual
water usage

Monitors
temperature in
the facility

Supports remote
volunteers and
management

FPMA and RSUI Indemnity believe this technology has the ability to significantly reduce claim costs associated with plumbing system failures. To encourage members to install the system, Holmes Murphy has partnered with **Leak Defense** to extend a premium discount:

5% Annual Discount

Why Leak Defense?

#1

Water damage is the most frequently reported claim in the FPMA Property Program

\$9 million

The total amount paid on water loss claims during a recent winter break

What Does Leak Defense Offer?

Value Proposition

- ✓ Protection from leaks
- ✓ Water conservation
- ✓ Property damage prevention
- ✓ Water cost savings
- ✓ Flow monitoring

What Is It?

The **Leak Defense System** is the most effective plumbing water leak detector/detection with automatic water shut-off valve on the market.

How Does It Work?

If continuous water flow exceeds preset limits, an alarm is triggered and a notification is sent to the mobile app, an audible alarm will sound on the control panel and the water supply will be shut-off automatically.

Why Is It Important?

Properties are 7 times more likely to sustain damage from a plumbing leak than by a fire & 6 times more likely to sustain a loss from a plumbing leak than being burglarized. 42 cents out of every dollar in insurance payouts are linked to water damage.

Flow detection of leaks with the Leak Defense System has been shown by our insurance partners to be 96% effective!

Freeze claims each year cost hundreds of thousands of dollars. Over 90% of these losses occur over the three-week traditional winter break period when there is limited daily oversight of the facility further exacerbating the costs. While Leak Defense may not have prevented all losses, the extent of the damage would have been greatly diminished.
