

What Does Salamander Offer?

Prevents frozen pipes

Real time temperature monitoring and monitoring in sprinkler lines

Real time alerts

Supports remote volunteers and management

FPMA and RSUI Indemnity believe this technology has the ability to significantly reduce claim costs associated with plumbing system failures. To encourage members to install the system, Holmes Murphy has partnered with **Salamander Solutions** to extend a premium discount:

5% Annual Discount

Why Salamander?

#1

Water damage is the most frequently reported claim in the FPMA Property Program

\$9 million

The total amount paid on water loss claims during a recent winter break

What Does Salamander Offer?

Pipe Freeze Is Preventable For Wet Fire Sprinkler Systems!

Protect Against:

- ✓ Pipe Freeze Situations
- ✓ Discharge Damage Costs and Time
- ✓ System Repair Costs and Time
- ✓ Business Interruption Costs and Time
- ✓ Remediation Costs and Time
- ✓ Restoration Costs and Time

Ideal Installation Locations:

- ✓ Vulnerable Sprinkler Heads
- ✓ Attics and Vestibules
- ✓ Remote/Vacant Properties
- ✓ Transition Areas
- ✓ Unoccupied Spaces
- ✓ Riser Rooms

The **Salamander** system provides real time temperature monitoring of the water temperature in the sprinkler lines. It notifies the client before the loss occurs by sending notice when the water temperature drops to a dangerous level. This allows the client to heat the area in question before a pipe burst/water loss occurs.

Freeze claims each year cost hundreds of thousands of dollars. Over 90% of these losses occur over the three-week traditional winter break period when there is limited daily oversight of the facility further exacerbating the costs. While Leak Defense may not have prevented all losses, the extent of the damage would have been greatly diminished.
